ACKNOWLEDGEMENTS

This report has been prepared as part of the Environmental Research Technological Development and Innovation Programme under the Productive Sector Operational Programme 2000–2006. The programme is financed by the Irish Government under the National Development Plan 2000–2006. It is administered on behalf of the Department of the Environment, Heritage and Local Government by the Environmental Protection Agency which has the statutory function of co-ordinating and promoting environmental research. The EPA research programme for the period 2007–2013 is entitled Science, Technology, Research and Innovation for the Environment (STRIVE). The project was part funded by Teagasc.

The authors gratefully acknowledge the contribution of the following, without whose assistance the completion of this project would not have been possible:

The Steering Committee members, J. Brogan (Chair, EPA), Professor P. Loveland, Professor E.P. Farrell, and Dr. C. Campbell.

EPA Officers, H. Walsh, A. Wemaere and B. Donlon.

R.J. McCormack, a former member of the technical staff at Teagasc, Johnstown Castle for significant input into the sampling, processing and analysis of soils.

The field samplers, T. Linsbod, J. Galvin, M. Fitzpatrick, S. Molloy, E. Verling, T. Lonergan.

The research staff at Teagasc, Johnstown Castle, particularly Drs. N. Culleton, B. Coulter, and R. Schulte. Former research staff at Teagasc Johnstown Castle are also acknowledged for their expert opinion and discussion, particularly Drs. S. Diamond and G. Fleming.

The technical staff at Teagasc, Johnstown Castle, particularly S. McCormack, T. Cowman, C. Dowdall, N. Kinsella, E. McDonald, V. Staples, L. Moloney Finn, C. O'Connor, and L. Gaul. O. Larkin, a former member of the technical staff at Teagasc, Johnstown Castle is also acknowledged.

Dr. W. Kato, a former Walsh Fellow student at Teagasc, Johnstown Castle for analytical assistance.

G. Kramers for assistance in final editing of the report.

The administrative staff at Teagasc, Johnstown Castle, in particular, M. Esmonde, E. Spillane, S. Lacey, M. Cullen, A. Cardiff, and M. Foley. M. O'Leary, a former member of the administrative staff at Teagasc, Johnstown Castle is also acknowledged.

Dr. R. Fealy of Teagasc, Kinsealy for acquisition of GIS data.

Dr. R. Meehan of EurGeol for discussions on glacial geology.

Dr. K. Verbruggen of the Geological Survey of Ireland (GSI) for acquisition of GIS data.

Drs. G. Earls and D. Smyth of the Geological Survey of Northern Ireland for discussions on geochemical aspects of the study.

Drs. A. Higgins and C. Jordan of the Department of Agriculture and Rural Development, Northern Ireland for discussions on geochemical aspects of the study.

OMAC Laboratories, Loughrea, Galway; South West Water Laboratories, Exeter, UK; and Macaulay Analytical Services, Aberdeen for the provision of analytical services.

The provision of basic GIS layers from the Ordnance Survey of Ireland; soil survey data from Teagasc; geology and mine site data from GSI; DEM data from the NASA website; and CORINE land cover data from the EPA is also acknowledged.

DISCLAIMER

Although every effort has been made to ensure the accuracy of the material contained in this publication, complete accuracy cannot be guaranteed. Neither the Environmental Protection Agency, Teagasc nor the author(s) accept any responsibility whatsoever for loss or damage occasioned or claimed to have been occasioned, in part or in full, as a consequence of any person acting, or refraining from acting, as a result of a matter contained in this publication. All or part of this publication may be reproduced without further permission, provided the source is acknowledged.

SOIL QUALITY

The Soil Quality Section of the Environmental RTDI Programme addresses the need for research in Ireland to inform policymakers and other stakeholders on a range of questions in this area. The reports in this series are intended as contributions to the necessary debate on soil quality and the environment.
