Reasons for the Decision

The Environmental Protection Agency is satisfied, on the basis of the information available, that subject to compliance with the conditions of Licence Reg. No. P0369-01 granted on the 10 June 1999, as well as any amendments noted herein, any emissions from the activity will comply with and not contravene any of the requirements of Section 83(5) of the Environmental Protection Agency Act 1992 as amended.

A screening for Appropriate Assessment was undertaken to assess, in view of best scientific knowledge and the conservation objectives of the site, if the activity, individually or in combination with other plans or projects is likely to have a significant effect on any European Site. In this context, particular attention was paid to the European Sites at Monivea Bog SAC (Site Code: 002352), Rahasane Turlough SAC (Site Code: 000322) and Rahasane Turlough SPA (Site Code: 004089).

The activity is not directly connected with or necessary to the management of any European Site and the Agency considered, for the reasons set out below, that it can be excluded, on the basis of objective information, that the activity, individually or in combination with other plans or projects, will have a significant effect on any European Site and accordingly determined that an Appropriate Assessment of the activity was not required.

It has been determined that this installation is not likely to have a significant effect on the European Sites as the change does not substantially change the current nature or extent of operations and emissions at the installation.

Technical Amendment

In pursuance of the powers conferred on it by Section 96(1)(c) of the Environmental Protection Agency Act 1992 as amended, the Agency amends the licence, granted to Byrne-Mech Limited for an installation located at Raheen, Athenry, County Galway.

Henceforth, the licence shall be read in conjunction with the amendments set out below.

This Technical Amendment is limited to the following Glossary of Terms/Schedule/Condition(s):
Amendments

Glossary

The item below is to be inserted into the Glossary of the existing licence

Storm Water

Rain water run-off from roof and non-process areas.

New Conditions or Amended Conditions

Amend Condition 1.4 of the existing licence to read as follows:

Condition 1.4

Any reference in this licence to ‘site’ or ‘installation’ shall mean the plan area edged in red on Drawing No BM001 titled ‘Byrne Mech Ltd Site Layout Plan’. Any reference in this licence to ‘site’ or ‘installation’ shall mean the area thus outlined in red. The licensed activity shall be carried on only within the area outlined.

Insert Condition 9.3 as outlined below after Condition 9.2 in the existing licence.

Condition 9.3

Fire-water Retention

9.3.1 The licensee shall carry out a risk assessment to determine if the activity should have a fire-water retention facility. The licensee shall submit a report to the Agency for approval on the findings and recommendations of the assessment within three months of the date of grant of this licence.

9.3.2 In the event that a significant risk exists for the release of contaminated fire-water, the licensee shall, based on the findings of the risk assessment, prepare and implement, with the agreement of the Agency, a suitable risk management programme. The risk management programme shall be fully implemented within three months of date of notification by the Agency.

9.3.3 In the event of a fire or a spillage to storm water, the site storm water shall be diverted for collection. The licensee shall examine, as part of the response programme in Condition 9.3.2 above, the provision of automatic diversion of storm water for collection. Firewater retention shall be in accordance with Agency guidance.

9.3.4 The licensee shall have regard to the Environmental Protection Agency Draft Guidance Note to Industry on the Requirements for Fire-Water Retention Facilities when implementing Conditions 9.3.2 and 9.3.3 above.
New Schedule

To be inserted after Schedule 2(ii) Other Wastes for Disposal/Recovery of the existing licence.

Schedule 3(i) Monitoring of Storm Water Emissions

Emission Point Reference No: SW7 and SW3 outlined in Drawing No BM001 titled Byrne Mech Ltd Site Layout Plan.

Replace reference to Schedule 3(i) with Schedule 4(i) in the existing licence.

Replace references to surface water in the existing licence with storm water in the following conditions:

- Condition 4.1.4
- Condition 9.1
- Condition 9.2
- Condition 10.7.4

This technical amendment shall be cited as Amendment A to the licence.

Sealed by the Seal of the Agency on this the 18th day of October, 2016

PRESENT when the seal of the Agency was affixed hereto

Mary Turner, Authorised Person
