Reasons for the Decision

The Environmental Protection Agency is satisfied, on the basis of the information available, that subject to compliance with the conditions of Licence Reg. No. P1022-02 granted on the 14 February 2019 as well as any amendments noted herein, any emissions from the activity will comply with and not contravene any of the requirements of Section 83(5) of the Environmental Protection Agency Act 1992 as amended.

Clerical Amendment

In pursuance of the powers conferred on it by Section 96(1)(a) of the Environmental Protection Agency Act 1992 as amended, the Agency amends the licence, granted to Dublin Port Company, Port Centre, Alexandra Road, Dublin 1 for an installation located at Port Centre, Alexandra Road, Dublin 1.

Henceforth, the licence shall be read in conjunction with the amendments set out below.

This clerical amendment is limited to the following:
Amendments

Amended Decision & Reasons for the Decision

The Environmental Protection Agency is satisfied, on the basis of the information available, that subject to compliance with the conditions of this licence, any emissions from the activity will comply with and will not contravene any of the requirements of Section 83(5) of the Environmental Protection Agency Act 1992 as amended.

The Agency also considers that the activities will not adversely affect the integrity of any European Site, and has decided to impose conditions for the purposes of ensuring they do not do so. It has determined that the activity, if managed, operated and controlled in accordance with the licence, will not have any adverse effect on the integrity of any of those sites.

The Agency has accordingly decided to grant a revised licence to Dublin Port Company, to carry on the activities listed in Part I, Schedule of Activities Licensed, subject to the conditions set out in Part III, Conditions; such licence to take effect in lieu of Licence Register Number: P1022-01.

No objection having been received to the proposed determination, the licence is granted in accordance with the terms of the proposed determination.

In reaching this decision the Agency has considered the documentation relating to the existing licence, Register Number: P1022-01; the review application, Register Number: P1022-02 and the supporting documentation received from the applicant; the Inspector’s Report dated 11 December 2018; and has carried out an Environmental Impact Assessment (EM) Screening and an Appropriate Assessment of the likely significant effects of the activities on European Sites.

A screening for Appropriate Assessment was undertaken to assess, in view of best scientific knowledge and the conservation objectives of the site, if the activities, individually or in combination with other plans or projects are likely to have a significant effect on any European Site. In this context, particular attention was paid to the European Sites at South Dublin Bay and River Tolka Estuary SPA (Site code: 004024), South Dublin Bay SAC (Site code: 000210), North Dublin Bay SAC (Site code: 000206), North Bull Island SPA (Site code: 004006) and Rockabill to Dalkey Island SAC (Site code: 003000); Howth Head Coast SPA (Site Code: 004113); Baldoyle Bay SPA (Site Code: 004016); Ireland’s Eye SPA (Site Code: 004117); Malahide Estuary SPA (Site Code: 004025); Lambay Island SPA (Site Code: 004069); Rogerstown Estuary SPA (Site Code: 004015); Dalkey Islands SPA (Site Code: 004172); Wicklow Mountains SPA (Site Code: 004040); Baldoyle Bay SAC
The activities are not directly connected with or necessary to the management of any European Site and the Agency considered, for the reasons set out below, that it cannot be excluded, on the basis of objective information, that the activities, individually or in combination with other plans or projects, will have a significant effect on any European Site and accordingly determined that an Appropriate Assessment of the activities was required.

- The proposed activities are located in close proximity to five European Sites and a further 24 European Sites lie within 19km of the installation.
- The proposed activities may result in adverse effects on water quality and disturbance impacts on qualifying interests at the European Sites.

The Agency notes that a Natura Impact Statement was submitted as part of the licence application documentation for P1022-02.

The Agency has completed the Appropriate Assessment of potential impacts on these sites and has made certain, based on best scientific knowledge in the field and in accordance with the European Communities (Birds and Natural Habitats) Regulations 2011 as amended, pursuant to Article 6(3) of the Habitats Directive, that the activities, individually or in combination with other plans or projects, will not adversely affect the integrity of any European Site, in particular South Dublin Bay and River Tolka Estuary SPA (Site code: 004024), South Dublin Bay SAC (Site code: 000210), North Dublin Bay SAC (Site code: 000206), North Bull Island SPA (Site code: 004006) and Rockabill to Dalkey Island SAC (Site code: 003000), having regard to their conservation objectives and will not affect the preservation of these sites at favourable conservation status if carried out in accordance with this licence and the conditions attached hereto for the following reasons:

- The licence specifies emission limit values in Schedule B.2: Emissions to Water, of this licence for relevant parameters in the waste water discharge, which are set to ensure compliance with the requirements of the European Communities Environmental Objectives (Surface Water) Regulations 2009, as amended.
- The results of coastal process modelling presented in the NIS conclude that there will be no impact on the intertidal habitats that support the species designated as qualifying interests.
- The results of modelling presented in the NIS of waste water and storm water discharges from the treatment area conclude that there will be no measurable impact on the environment.
The drainage system on site will maintain a separation between the clean storm water and runoff which has the potential to be contaminated, which will be treated onsite before discharge.

Schedule C: Control & Monitoring of this licence of the licence provides for control and monitoring of storm water emissions and emissions to surface water from the installation.

Conditions in the licence require that all drainage from bunded and waste storage areas be treated as contaminated, (Condition 3.9.3), while visual inspections and proper maintenance are also provided for (Condition 6.11 & 6.12).

A Marine Mammal Observer will be engaged during licensed activities and activities associated with licensed activities at the installation that may cause disturbance impacts on the Harbour Porpoise, which is highly mobile within its habitat (Condition 6.16.3).

Noise-producing activities will only take place during daylight hours where visibility provides for effective monitoring. (Condition 6.16.4).

The Agency is satisfied that no reasonable scientific doubt remains as to the absence of adverse effects on the integrity of those European Sites South Dublin Bay and River Tolka Estuary SPA (Site code: 004024), South Dublin Bay SAC (Site code: 000210), North Dublin Bay SAC (Site code: 000206), North Bull Island SPA (Site code: 004006) and Rockabill to Dalkey Island SAC (Site code: 003000).

Amended Conditions

Amend Conditions 3.12.3 and 3.12.4, of the licence to read as follows:

3.12.3 In the event of a fire or a spillage to storm water, the site storm water shall be diverted for collection. The licensee shall examine, as part of the response programme in Condition 3.12.2 above, the provision of automatic diversion of storm water for collection. The licenses shall have regard to any guidelines issued by the Agency with regard to firewater retention.

3.12.4 The licensee shall have regard to the Environmental Protection Agency Draft Guidance Note to Industry on the Requirements for Fire-Water Retention Facilities when implementing Conditions 3.12.1 and 3.12.2 above.
Amend Condition 11.7, of the licence to read as follows

11.7 The licensee shall make a record of any notification made under Condition 11.5 and 11.6. This record shall include details of the nature, extent, and impact of, and circumstances giving rise to, the incident or accident. The record shall include all corrective actions taken to manage the incident or accident, minimise wastes generated and the effect on the environment, and avoid recurrence. In the case of a breach of a condition, the record shall include measures to restore compliance.

This Clerical Amendment shall be cited as Amendment A to the licence.

Sealed by the Seal of the Agency on this the 26th day of April, 2019

PRESENT when the seal of the Agency was affixed hereto

Tara Gillen, Director/Authorised Person
