**Reasons for the Decision**

The Environmental Protection Agency is satisfied, on the basis of the information available, that subject to compliance with the conditions of Licence Reg. No. P0386-04 granted on 2 May 2019 as well as any amendments noted herein, any emissions from the activity will comply with and not contravene any of the requirements of Section 83(5) of the Environmental Protection Agency Act 1992 as amended.

A screening for Appropriate Assessment was undertaken to assess, in view of best scientific knowledge and the conservation objectives of the site, if the activities, individually or in combination with other plans or projects are likely to have a significant effect on any European Site. In this context, particular attention was paid to the European Site(s) at Blackwater River (Cork/Waterford) SAC (002170) SAC and Ballyhoura Mountains SAC (002036).

The activities are not directly connected with or necessary to the management of any European Site and the Agency considered, for the reasons set out below, that it can be excluded, on the basis of objective information, that the activities, individually or in combination with other plans or projects, will have a significant effect on any European Site and accordingly determined that an Appropriate Assessment of the activities was not required.

This determination is based on the technical amendment which does not involve changing any permitted discharges from the installation to surface water, ground waters, land or air and therefore will not impact the Natura 2000 sites referred to above.

**Technical Amendment**

In pursuance of the powers conferred on it by Section 96(1)(c) of the Environmental Protection Agency Act 1992 as amended, the Agency amends the licence, granted to Kerry Ingredients (Ireland) Limited for an installation located at Rathgoggan Middle, Charleville, County Cork.

Henceforth, the licence shall be read in conjunction the amendments set out below.

This Technical amendment is limited to the following Condition:
Amendments

Amended Condition

Amend Condition 6.14.2, of the licence to read as follows:

6.14.2 The licensee shall within twelve months of date of grant of licence establish and thereafter maintain trigger levels for pH, conductivity, COD, ammonia and orthophosphate at ASW6, ASW7 and SW16.

This Technical Amendment shall be cited as Amendment A to the licence.

Sealed by the Seal of the Agency on this the 4th day of September, 2019

PRESENT when the seal of the Agency was affixed hereto

Caltriona Collins, Authorised Person
