

## **PRTR Workbook – Treatment and Transfers of Waste Tab**

### **Reporting of On-Site Treatment & Offsite Transfers of Waste under PRTR**

Examples of the types of waste that could potentially be imported and/or accepted at your site/facility for on-site treatment either by recovery or disposal, if authorised:

- Wastes accepted for use as a fuel (e.g. wood wastes, refuse derived fuel, sludges).
- Wastes accepted for reclamation/regeneration/refining (e.g. solvents, used oils).
- Wastes accepted for manufacturing or other processes (e.g. plastic wastes, wood waste, waste tyres shredded and put into concrete blocks, waste metal melted down to make new products, waste glass crushed and used as cullet).
- Wastes accepted for composting (e.g. food & green waste).
- Waste accepted for rendering (e.g. food waste, edible oils and fats, sludges, grease trap waste).
- Wastes accepted for infill sites or on-site construction works (e.g. soil and stones).
