

Erratum for the Monitoring and Reporting Plan for the period 2008-2012

Dear Participants,

Please note that there was an omission in the guidance for Table A2.1 on the above form (IRL ETS 003/2).

The Guidance should read:

‘This table should only include those activities and emission points as identified in Tables 2 and 3 of your GHG permit **and** any new emission points that have been notified to the EPA but for which a revised GHG permit has yet to be issued. Directly Associated Activities (DAAs) should not be included.’

The on-line form has been updated. **Please note that the template remains unchanged and there is no need to use the latest form if you have already completed the template.**

If you have any question please contact GHGpermit@epa.ie

Many thanks
