What is DROPLET?

DROPLET

Database of **R**esearch **O**utputs: **P**rojects,
Literature and **E**nvironmental **T**echnologies

DROPLET is an [easy-to-use](#) interactive web application for exploring information about projects which have been funded in Ireland on Water Research. DROPLET has been developed by the [Environmental Protection Agency](#) but includes projects from many other [funders of environmental research in Ireland](#). More general information about DROPLET is available on the 'About DROPLET' page.

EXPLORE RESEARCH

DROPLET provides two principal means of exploring the project information database. There is an interactive research map-based viewer and a searchable/sortable table viewer.

How DROPLET is used

Summary

- Building a site that is designed to suit it's users
- Searchable and visual with a modern *responsive design*
- Log-on management facility
- Standardised to connect with similar database systems
- Currently focuses on WATER - Flexible to incorporate other thematic areas
- There have been 9084 web hits to the DROPLET website since it was launched earlier this month.
- As of now, there are 446 project descriptions listed in the DROPLET database
- 13 funding organisations with user profiles
- dropletadmin@epa.ie
