GreenIT

Circular Business Model: Refurbished and remanufactured ICT products

Since 2010, GreenIT has reconditioned and distributed over 500,000 ICT devices.

In 2024, the Office of Government Procurement awarded a contract for the provision of remanufactured laptops (BSI Kitemark certified) to GreenIT and Circular Computing.

Over the lifetime of the contract, it is hoped that up to 60,000 remanufactured laptops will be procured by public bodies, resulting in carbon and resource efficiency savings compared to buying new products.

GreenIT featured as a 'Local Circular Solutions' organisation at the EPA Circular Economy Conference in 2024
