

DRINKING WATER QUALITY PUBLIC SUPPLIES

Drinking water quality public supplies 2016

If there's a problem

National priorities

- Disinfection keeping water free of bugs
- Trihalomethanes minimising disinfection by-products
- Lead Eliminating lead from our networks
- Pesticides Preventing pesticides from entering our waters
- Water safety plans Managing the risks to our supplies

Irish water to develop and implement strategies

What you can do

- Replace any lead fittings in your home
- Don't waste water
- Use pesticides responsibly
