

Office of Environmental Enforcement,
Environment Protection Agency,
Inniscarra,
Co. Cork.

Dear Sir/Madam,

As advised in Licensee Return LR075975, Port of Waterford has an urgent requirement to undertake dredging in Duncannon Bar due to a serious inundation of sediment. Suitable plant – TSHD Amazone – has now become available and will mobilise to be on site w/c 29th May 2023. The dredger will also undertake maintenance dredging at other licensed loading areas.

The campaign is expected to last for approximately 28 days and will be followed by bed levelling.

A Notice to Mariners will be posted on our website www.portofwaterford.com

Yours faithfully,

Ian Moriarty

Captain Ian Moriarty
Deputy Harbour Master
