

Instrument Calibration Charges (effective 1st January 2027)

- Please note that most dose rate survey meters have multiple scales. Please ensure that the purchase order provided covers the price of a multiple dose rate meter (€227 excluding VAT). If the instrument only has one scale, the lower price will be charged.
- A dual-mode test typically consists of both dose rate survey meter (multiple scales) and surface contamination calibrations.
- For queries related to instrument pricing and quotations, please email epacalibration@epa.ie
