

Current Instrument calibration charges

- Please note that most dose rate survey meters have three scales. Please ensure that the purchase order provided covers the price of three-scale dose rate meter (€173 excluding vat). If the instrument has one or two scales, the lower price will be charged.
- Instruments that operate in more than one mode e.g. instruments that operate as a contamination monitor and a dose rate survey meter, will be charged for both calibrations (unless it is indicated at the time of booking that only one of the calibrations is required). Please ensure that the purchase order provided covers both calibrations.
- For queries related to instrument pricing and quotations, please email epacalibration@epa.ie
- Please send all purchase orders to epacalibration@epa.ie
