agreed they needed more information or education about climate change

YOUNG PEOPLE **FROM GALWAY CITY AND COUNTY**

TRANSFORMING EDUCATION

Through exploring young people's sense-making we can understand what transformative climate change education might look like in relation to reducing the value-action gap

BASELINE DATA

The survey findings informed focus groups, interviews and narrative workshops to explore young people's experience of climate change and identify the valueaction gap

POLICY AND TOOLKIT DEVELOPMENT

We are using this to inform policy makers, and develop a climate change education toolkit and other resources for 15-18 year olds
