

Environmental RTDI Programme 2000-2006

**INVESTIGATION OF THE RELATIONSHIP BETWEEN
FISH STOCKS, ECOLOGICAL QUALITY RATINGS (Q-
VALUES), ENVIRONMENTAL FACTORS AND DEGREE
OF EUTROPHICATION**

Final Report

Project Coordinator: Trevor Champ

Authors

Fiona Kelly, Trevor Champ, Neasa McDonnell, Mary Kelly-Quinn, Simon Harrison, Alison Arbuthnott, Paul Giller, Mike Joy, Kieran McCarthy, Paula Cullen, Chris Harrod, Phil Jordan, David Griffiths, and Robert Rosell.

ACKNOWLEDGEMENTS

This report has been prepared as part of the Environmental Research Technological Development and Innovation programme 2000-2006. The programme is financed by the Irish Government under the National Development Plan 2000-2006. It is administered on behalf of the Department of the Environment and Local Government by the Environmental Protection Agency which has the statutory function of co-ordinating and promoting environmental research.

The project team gratefully acknowledge the assistance from the following people: staff of the Eastern, Northern, Northwestern, Shannon, Southern, Southwestern and Western Regional Fisheries Boards, Ms. Sandra Doyle, Ms. Karen Delanty, Dr. Martin O' Grady, Ms. Fionnuala O' Connor, Ms. Sara McDevitt, Dr. Joe Hennelly, Professor John J. Bracken, Mr Tim Stokes and Dr Catherine Bradley, Dr Jerome Masters, Dr Jan-Robert Baars, Brid Aherne, Dr Fintan Bracken and Dr. I. Donohue. Mr. R. Humphries (DCAL). Conservation Services carried out macroinvertebrate sampling on the Laune catchment and also provided some archival fish data. We also wish to thank Dr. M. Kelly Quinn, Dr. W. Roche (CFB) and Martin McGarrigle (EPA) for their help and assistance throughout the project.

DISCLAIMER

Although every effort has been made to ensure the accuracy of the material contained in this publication, complete accuracy cannot be guaranteed. Neither the Environmental Protection Agency nor the authors accept any responsibility whatsoever for loss or damage occasioned or claimed to have been occasioned, in part or in full, as a consequence of any person acting or refraining from acting, as a result of a matter contained in this publication. Details of Project Partners

Trevor Champ (Project coordinator) and Fiona Kelly
Central Fisheries Board,
Swords Business Campus,,
Swords,
Co. Dublin
Tel: +353-1-8842600
Fax: +353-1-8360060
Email: Fiona.Kelly@cfb.ie and Trevor.Champ@cfb.ie

Mary Kelly Quinn
School of Biological and Environmental Science,
University College Dublin
Belfield
Dublin 4
Tel: +353-1-7162337
Fax: +353-1-716XXXX
Email: Mary.Kelly-Quinn@ucd.ie

Kieran McCarthy,
Zoology Department,
National University of Ireland Galway,
Galway
Tel: +353-91-512008
Fax: +353-91-750526
Email: tk.mccarthy@nuigalway.ie

Simon Harrison and Paul Giller
Department of Zoology and Animal Ecology
University College Cork
Lee Maltings
Prospect Row
Cork
Tel: + 353-21-4904195
Fax:
Email: s.harrison@ucc.ie

David Griffiths and Philip Jordan
School of Environmental Studies
University of Ulster,
Cromore Road, Coleraine,

Table of Contents

DISCLAIMER	ii
ACKNOWLEDGEMENTS	ii
Details of project partners	iii
Chapter 1: Introduction to the Project	1
1.1 Summary of chapter	
1.2 Background to the project	
1.3 Requirements in relation to fish in the Water Framework Directive	
1.4 Freshwater fish communities in Ireland	
1.4.1 Exotic species	
1.5 Fish stock assessment in Ireland	
1.6 The use of fish as indicators for the ecological quality of running waters	
1.7 Aims and objectives of the project	
1.7 Project Management, role of participants and structure of report	
Chapter 2: Work Package 1A: Establish relationship between Q-value and Fish stock composition and abundance	12
2.1 Overview of chapter	
2.2 Introduction	
2.2.1 Aims of workpackage	
2.3 Methods	
2.3.1 Site selection	
2.3.2 Core rivers	
2.3.3 Sampling regime	
2.3.4 Data analysis	
2.4 Results	
2.4.1 Q-values versus altitude	
2.4.2 Spatial variation on core rivers	
2.4.3 Relationship between fish and Q-values	
2.4.4 Classification of fish using TWINSpan	
2.4.5 Classification of macroinvertebrates using TWINSpan	
2.4.6 Concordance of fish and macroinvertebrates	
2.4.7 Mantel correlation	
2.4.8 Environmental definition of macroinvertebrate and fish sites using ordination	
2.5 Discussion	
2.6 Conclusions	
2.7 Recommendations	
Chapter 3: Workpackage 1B: Development of a predictive model to predict the composition of fish in rivers	46
3.1 Overview of chapter	
3.2 Introduction	
3.2.1 Predictive modelling	
3.2.2 The Reference Condition approach	

- 3.2.3 Aims of workpackage
- 3.3 Methods
 - 3.3.1 Study area
 - 3.3.2 Sampling regime
 - 3.3.3 Statistical analysis-Predictive modelling
- 3.4 Results - Model development of reference sites with and without barriers, to fish migration, present downstream
 - 3.4.1 Fish assemblages
 - 3.4.2 Relationships between fish assemblages and physical/chemical data
 - 3.4.3 Calculation of O/E ratios
 - 3.4.3 Model evaluation
 - 3.4.4 Probability cut-off levels for inclusion of taxa
- 3.5 Results - Model development of reference sites without barriers
- 3.6 Discussion

Chapter 4: Work Package 2: Develop an appropriate sampling protocol for assessment of the status of fish stocks in rivers for the WFD (and preliminary proposals for lakes)

58

- 4.1 Overview of chapter
- 4.2 Rivers – Introduction
 - 4.2.1 Methods
 - 4.2.2 Results
 - 4.2.3 Discussion
 - 4.2.4. Conclusions
 - 4.2.5. Recommendations
- 4.3 Lakes - Introduction
 - 4.3.1 Study area
 - 4.3.2 Methods
 - 4.3.3 Results
 - 4.3.4 Discussion and conclusions
 - 4.3.5 Recommendations

Chapter 5: Work Package 3 (b): Micro distribution of brown trout and eels in relation to diurnal oxygen variation

77

- 5.1 Overview of chapter
- 5.2 Introduction
 - 5.2.1 Aims
- 5.3. Methods
 - 5.3.1. Study sites
 - 5.3.2 Fish tagging
 - 5.3.3 Telemetry
 - 5.3.4 Abiotic conditions
 - 5.3.5 Data analysis
- 5.4 Results
 - 5.4.1 Abiotic factors
 - 5.4.2 Diel movement of trout
- 5.5 Discussion

5.6 Conclusion

Chapter 6: Work Package 3 (c): Survival Of Salmonid Eggs Along A Water Quality/Nutrient Gradient 97

6.1 Overview of chapter

6.2 Introduction

6.2.1. Aims and objectives

6.3 Materials and Methods

6.3.1 Site selection/ study area

6.3.2 Fieldwork

6.3.3 Laboratory Analysis

6.3.4 Statistical Analysis

6.4 Results

6.4.1 Egg mortality along a water quality gradient.

6.4.2 Predicted mortality at each site.

6.4.3 Relationships between biological, chemical and physical variable measured at each site.

6.4.4 Factors affecting egg/alevin mortality

6.4.5 Alevin growth in relation to temperature.

6.5. Discussion

6.5.1 Other problems encountered during the project

6.6 Conclusions

Chapter 7: References 116

Appendices 133
